High-spec, heavy-duty double mitre saws designed to cut precise 45° mitres for picture framing and woodworking applications. Their speed, reliability and consistently high-quality output make them ideal for medium-to high-production environments.

The T-2000 series uses innovative vertical drop technology and has a unique pneumatic control system which totally supports the weight of the cutting assembly allowing a very smooth down-stroke, precise cuts and a quick return process.

The two saw blades are fixed at 45° angles and have an adjustable blade descent speed. During the cutting process the moulding is held firmly in place by four pneumatic clamps ensuring precision cuts every time.

**T-2350** – up to 80mm moulding width  
**T-2450** – up to 120mm moulding width

### Features

- Comfortable two-handed push button operation to activate blades
- Four adjustable clamps to secure moulding firmly to the workbench
- Cuts wood, Polcore and MDF mouldings
- Smooth, precise cutting action
- Minimal waste – knockout as little as 1.6mm
- Adjustable blade descent speed (slower for harder woods, faster for Polcore)
- Two measurement stops (one flip and one fixed)
- Engraved measurement gauge and metric ruler to read the internal or external dimensions of the frame (inch gauge optional)
- External waste collection chute
- Solid in-feed and out-feed tables
- Quick blade change
- Cutting speed: up to 12 cuts/minute

A demo model is available to try in our workshop!  
Please call 01949 861000 to arrange an appointment.

Four adjustable  
clamps

Engraved  
measurement gauge

### Technical Specification

Weight:	500kg approx.
Saw motor:	2x1.5Kw (400V – 3PH)
Pressure:	4 –8 Bar
Air consumption:	8NL at 5 Bar 0.28cf <sup>3</sup> at 73 Psi
Power supply:	3Kw 400V

### Safety Features

- Emergency stop button
- Blade door complete with safety switch
- Adjustable polycarbonate front guard
- Two 1.5kw (2HP) braking motors
- Two 80mm dust collector ports
- CE compliant

### Optional Accessories

- Optional vertical clamps (6 per side) particularly useful for large or odd-shaped mouldings
- Pneumatic horizontal clamp
- Mist spray cooling system for aluminium cuts
- Right extension arm with gauge; left extension arm without gauge

**A+AUTOMATION**

A+ Automation has been providing the picture framing industry with high-performance cutting and joining equipment for over twenty years. Superior engineering and advanced research has led to a well-earned reputation for innovative high-quality machines that are safe, durable and extremely reliable.

A demo model is available to try in our workshop!
